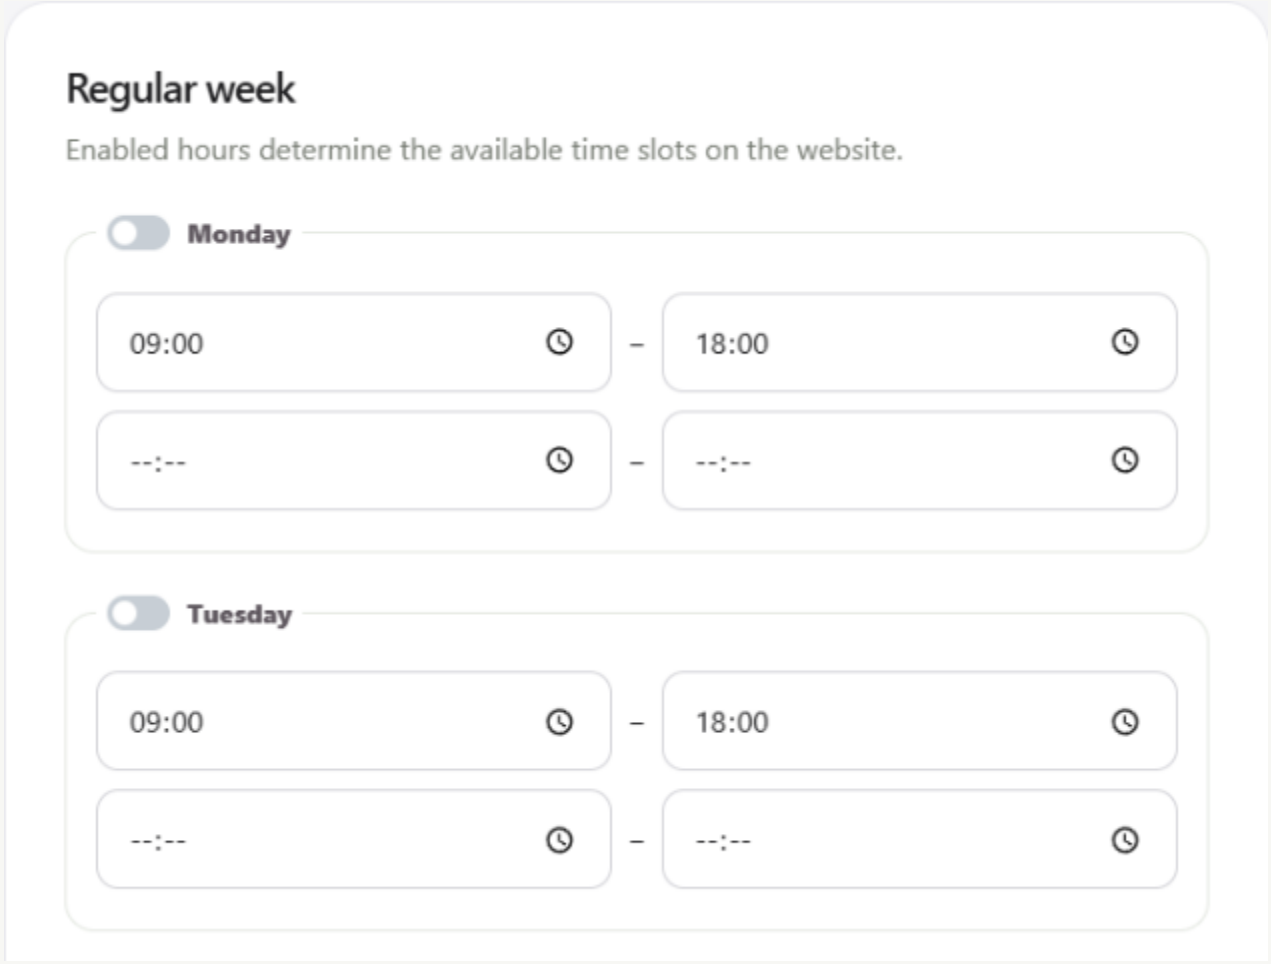
Nearest appointment

Mon, Nov 16, 10:00 — Single-process colour

Check times

Example profiles and data



Your day under control.

Appointment calendar

Day, week and month views.

Availability

Working hours, breaks and days off.

Services and prices

Your offer and durations in one workspace.

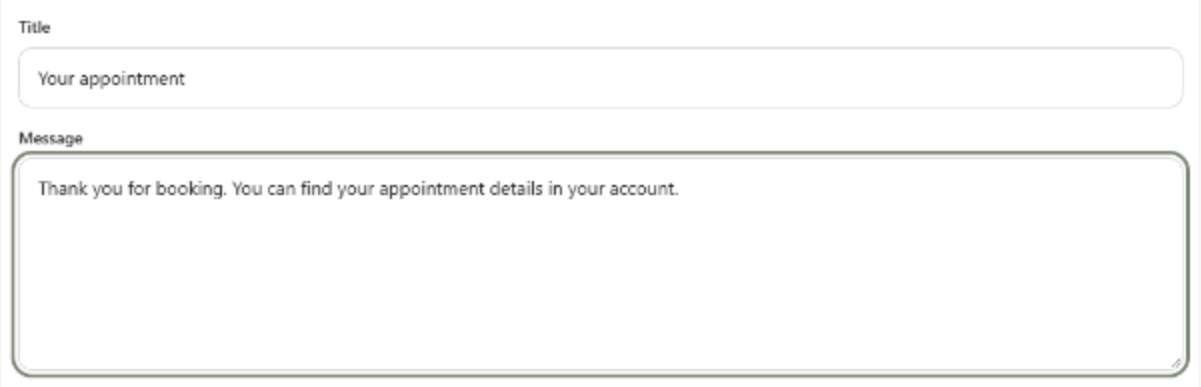
Client relationships, organised.

History and notes

Your own visits and client information.

Internal messages

Reach registered clients inside their accounts.

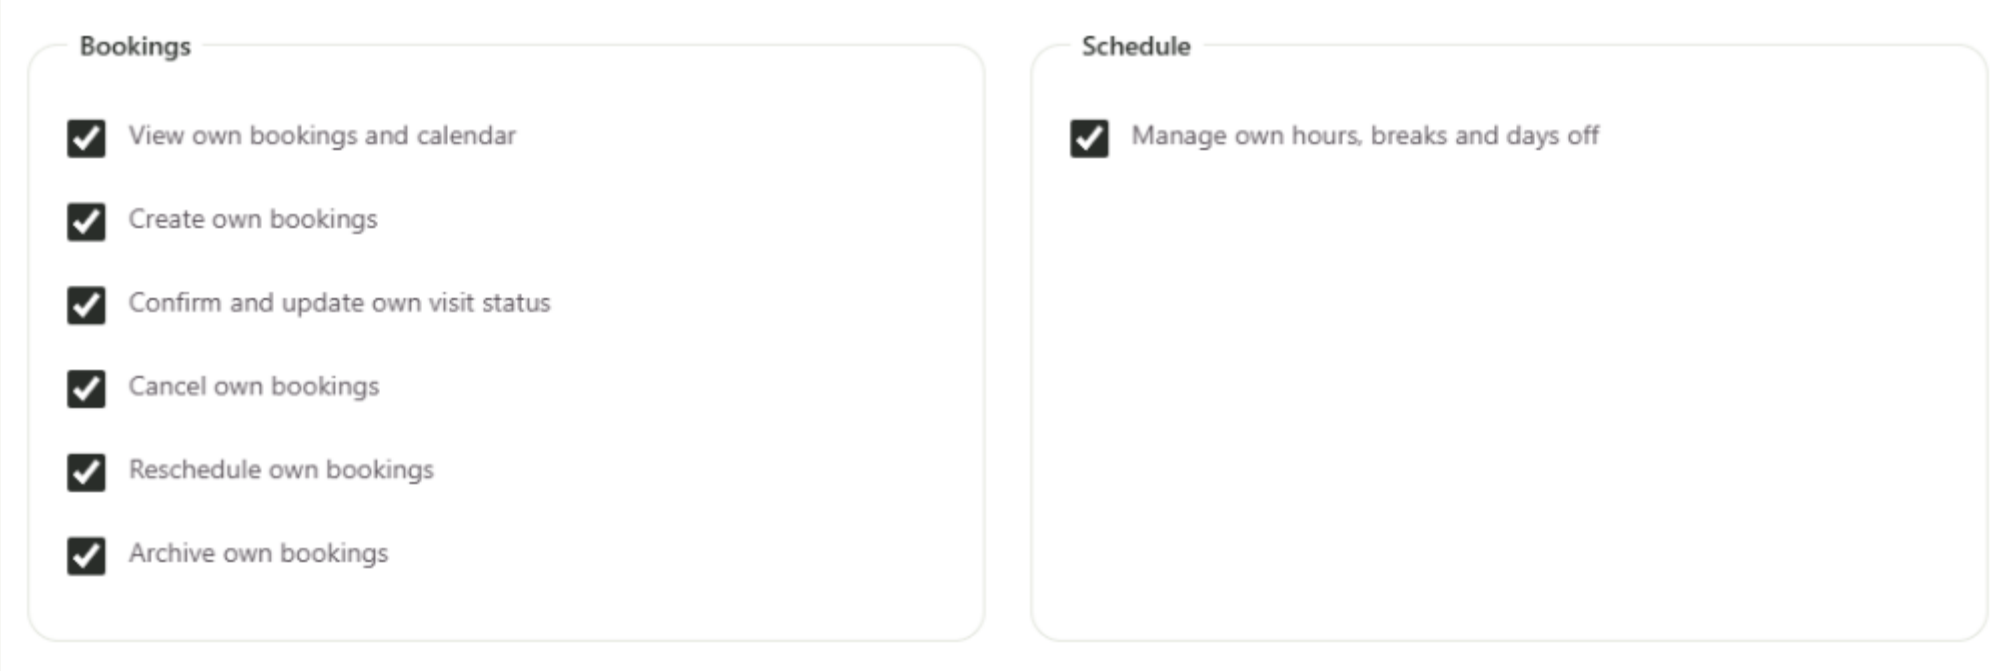


SMS is a separate channel: client consent, provider setup and permissions are required.

FOR STUDIOS

A team with clear permissions.

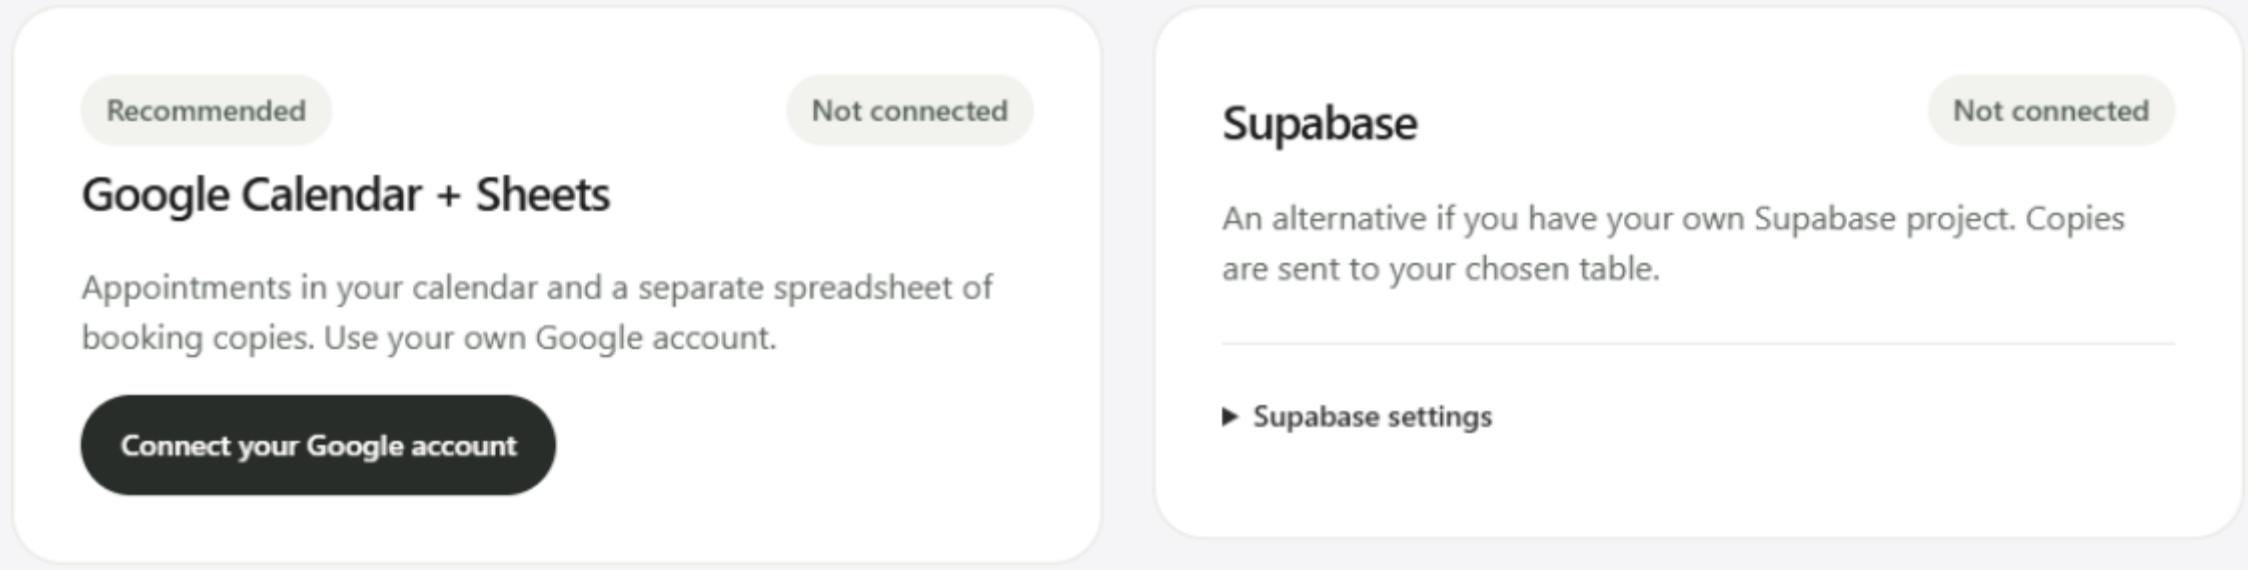
Team invitations, separate accounts and access set for each professional.



A studio administrator controls access to calendars, clients, content and communication.

Copies in your own tools.

Google Calendar + Google Sheets as the recommended destination. Supabase as an alternative.



View before connecting a provider

Once connected: queue, errors and last delivery. Add earlier bookings or download CSV / ICS.
Integrations require configuration and authorisation.

Start with Beautier.

Client: choose a professional and a time.

Professional: add a profile, services and hours.

Studio: invite the team and set permissions.

The professional account works immediately.
The public page may be reviewed for up to 1 day.
It becomes visible after approval.
